## COMMUNITY SERVICES

### Our services:

We provide rehabilitation services to a broad range of clients specialising in:

- Traumatic brain injury
- Chronic pain
- Musculo-skeletal conditions

Our services are delivered in clinical, home and work based settings. Services are delivered by working alongside family members, employers, educators and other support people.

All our services are provided by highly skilled and experienced interdisciplinary team members. By working in teams, clinicians enhance the quality and range of services that we can offer to our clients. Our services include the following areas of specialty:

#### Occupational and Physiotherapy:

Our therapists provide comprehensive assessment and rehabilitation to clients to ensure their physical, vocational and psychosocial wellbeing. Our therapists specialise in TBI, pain management, workplace issues and pediatrics.

#### Clinical and Neuropsychology:

We provide Neuropsychological assessment for people experiencing a wide range of cognitive impairments. Clinical psychology interventions focus on reducing and managing anxiety, depression, anger and other counterproductive emotions and behaviour patterns following injury.

#### MTBI Clinic:

Our MTBI Clinic includes a Neuropsychological screen and medical assessment as well as OT and CP intervention to provide education to those suffering from a MTBI. Referrals for this clinic are taken from ACC, GPs and hospitals.

#### Speech and language therapy:

We provide assessment and intervention for people suffering from communication and swallowing disorders following injury. This includes motor speech disorder, receptive and expressive language disorders including difficulties in reading/writing, social communication issues and voice disorders.

#### Our services include:

- MTBI Clinic
- Neuropsychological Assessment
- Clinical Psychology Assessment and Rehabilitation
