

## NEUROPSYCHOLOGICAL SERVICES

Abano Rehabilitation is New Zealand's largest rehabilitation provider. Under our assessment brand, Health Partners, we are pleased to employ a number of highly skilled neuropsychologists who offer the following services:

- Assessments
- Interventions
- Consultation

### Assessment

Our clinicians are highly skilled in the assessment of cognitive impairment following injury. Through the use of standardised measures and clinical interview, our clinicians identify cognitive deficits to guide intervention. Neuropsychological evaluations often include but are not limited to the following areas:

- Attention and concentration
- Language skills
- General intellectual functioning
- Effects of mood and personality
- Visual-spatial skills
- Executive functioning
- Verbal and nonverbal memory skills

### Consultation

Our neuropsychologists have consulted with a number of agencies and organizations both in New Zealand and internationally, such as:

- Legal systems
- Community hospitals
- Schools and universities
- Governmental agencies
- Private insurance companies
- Correctional facilities

Our neuropsychologists are experienced in coordinating interventions, working in multidisciplinary teams, reviewing reports for a second opinion, providing training and offering professional guidance regarding neuropsychological issues.

### Intervention

Our neuropsychologists provide client focused interventions to:

- Create and implement treatment plans;
- Provide counselling services; and
- Document cognitive and behavioural changes over time.

Our interventions focus on utilizing as many of the client's natural supports as possible to foster their independence through the involvement of partners, family members, and other professionals.
